Message from the 3DV 2016 General Chair

On behalf of the organizing committee, I would like to welcome you to Stanford and the 6th edition of the 3D Vision (3DV) conference! This event provides a premier platform for disseminating research in the area of 3D computer vision, graphics and robotics. The program includes topics related to novel optical sensors, signal processing, geometric modeling, representation and transmission, visualization, and interaction, as well as a variety of applications.

3DV 2016 features an outstanding list of keynote speakers and it is coupled, for the first time, with an exhibit that provides an exciting opportunity to demonstrate research and products from both academia and industry. This year the conference is held at Stanford University, in the heart of Silicon Valley. Hopefully you will have time to visit the Stanford campus as well as some of the major highlights and attractions in the Bay Area.

Finally, I would like to express my deepest gratitude to all the people who have contributed to the organization of 3DV; the program committee members for their fundamental work in reviewing and selecting papers, and the organization committee for its relentless efforts to make the conference a success.

Silvio Savarese, Stanford University
3DV 2016 General Chair
